***Election/Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 13, drawn to an article, classified in class 428, subclass 15.
- II. Claims 8-12, drawn to a method, classified in class 427 subclass 297.

The inventions are distinct, each from the other because:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as subjecting the wood to elevated temperature and pressure in a closed reaction zone and introducing a polymerizable monomer into the reaction zone wherein the monomer may polymerize and deposit a thermoset polymer into the capillary walls of the woods.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CAR 1.143).

Art Unit: 1775

A telephone call was made to Ernest Chapman on 03/12/03 to request an oral election to the above restriction requirement, but did not result in an election being made
